***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art (APA') in view of Cryan et al. (US 6,487,351).

APA' discloses the instant claimed invention of an optical faceplate [figure 2] except to show a fiber optic bundle.

Cryan et al. discloses a fiber optic faceplate comprising a plurality of a fiber optic bundle.

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the device of APA' to include the fiber optic bundle as taught by Cryan et al. for the purpose of facilitating the transmission of the light signals.

The method steps are inherent in the product structure.
